

Notes for halloween plate

Please make sure the color is thoroughly dry before u apply the stencil if you don't the stencil will not stick! Put your hand on the plate if it feels cold it is not dry. Once you pounce on the colors over the stencil make sure you remove the stencil once the water sheen is gone. Make sure you get all the pieces of the stencil off. Once the front of the plate or bowl is dry turn over and apply 3 coats of the black glaze on the back of the piece. Use a foam sponge on a stick to do the rim on the front of the plate. It is the full container of black. Once that is dry flip the plate or bowl over and use the end of a brush (the handle) to make white dots on the edge of the plate. Let dry . Make sure u add your name to front of plate or bowl.

Please try and return piece to the library within a week.

Thank u and have fun
